

DIVIDE TRACK LIST

The Divide Track List is the icon highlighted in the picture above. This places a dividing point in your tracks. This places the Play Order Track, Video Track, and Marker Track above the dividing point and the other tracks below the dividing point. This allows you to scroll through your audio tracks while your Video Track, Marker Track, etc will stay static. To scroll through Video, Marker, or Play order tracks, use the scroll control above the divider.
