

## Cubase 4: Locating Content in HALionOne

If you are having trouble loading presets in HALionOne, you may need to locate the content so HALionOne sees the files that it needs to load.

To locate content, right click on the HALionOne window and select “Locate Contents”

Then browse to the HALionOne content folder (named HALionOneHSB), select it and click on “OK”

To get to the content folder, follow this path: C: drive ->Program Files -> Steinberg -> Cubase 4 -> VST Plugins -> Synths -> HALionOneHSB
