

Cubase 4 Drag and Drop Insert effects

Now you are able to rearrange the order of your insert effects. To do this, go to your inserts. Run your mouse over the number of the insert. You will see the cursor change to a hand.

Click with your mouse and hold. Now you can drag that insert into any one of the other slots. In this example we want to drag the compressor to insert 6.

You also have the choice to replace the current insert effect.

Click and drag the insert to a different slot. While still holding down the mouse button press Ctrl on your keyboard, you will then have the option to replace the current effect in that slot.
