

Cubase 4 Key Editor Trim Tool

Select the trim tool in the key editor. By default it will be located between the mute and split tools.

Locate the note(s) you wish to trim. To edit a single note, click on it with the Trim tool. The range between the mouse cursor and the end of the note will be removed. To edit several notes, click and drag with the mouse across the notes.

By default the trim tool can trim the end of notes, to trim the beginning of notes, press the ALT button on your keyboard while dragging the trim tool.

If you press the CTRL button on your keyboard while dragging you will get a vertical line.
