

## Cubase 4 Score - Adding Lyrics from the Clipboard

If you want to prepare your lyrics in another program, you can import them into Cubase 4 the following way:

1. Create the lyrics in another program.  
Separate words with space as usual, syllables within words with dash signs (-).
2. Copy the text.
3. In Cubase, select the first note to which the lyrics should be added.
4. Pull down the Scores menu and select “Lyrics from Clipboard” from the Text submenu.

The lyrics are added, starting at the selected note.
