

Burning a DVD in Wavelab 6

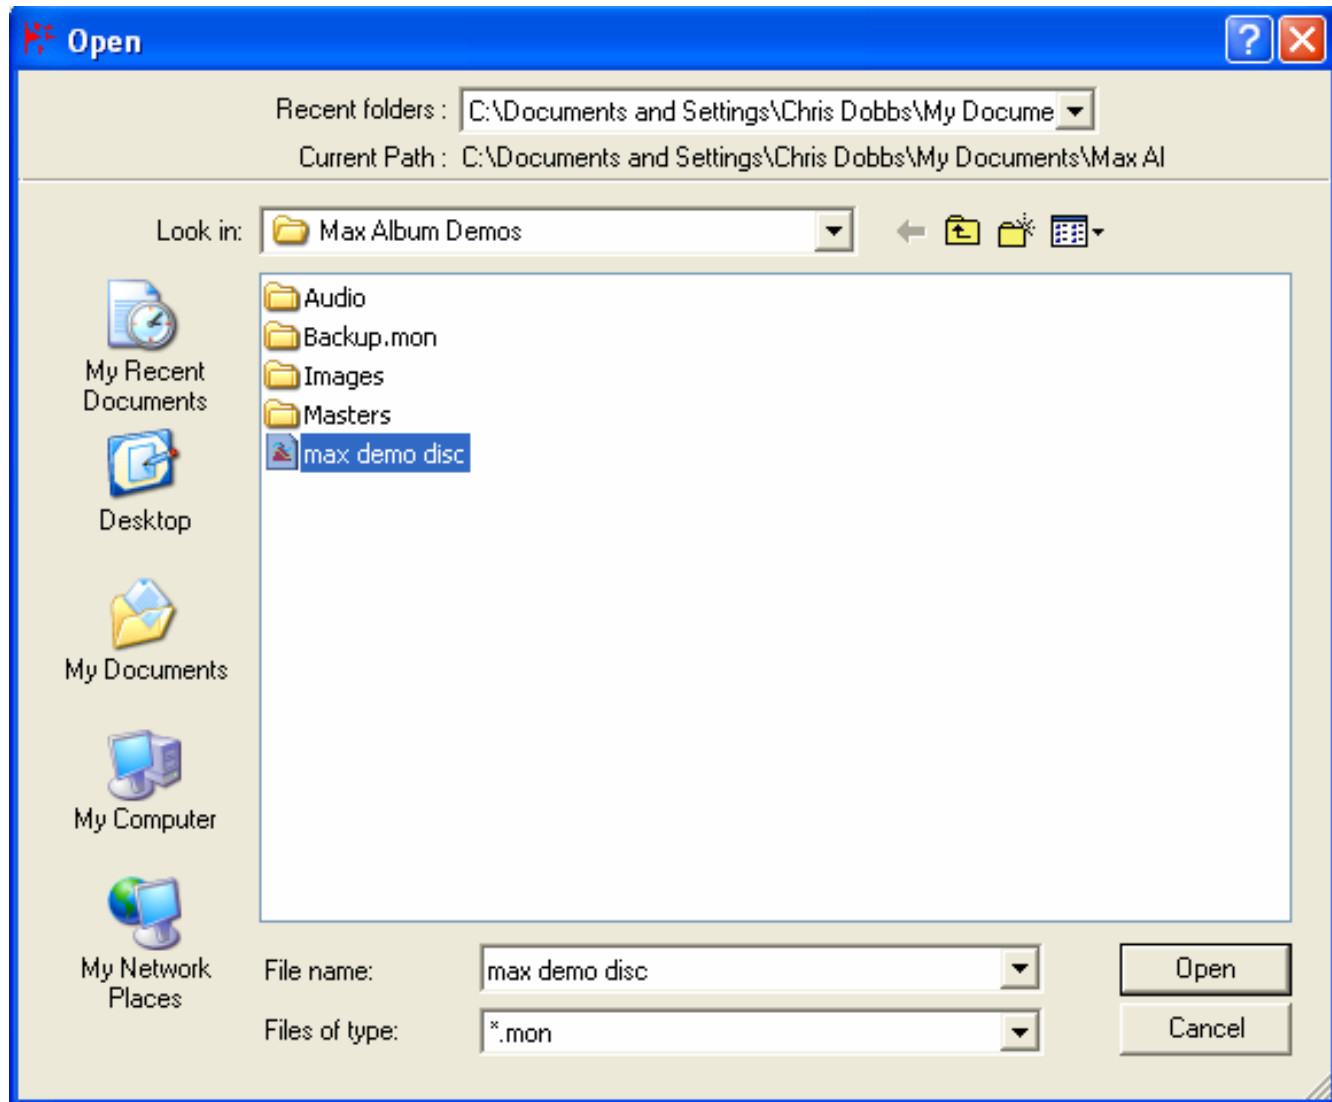

Open a New DVD-A Project

Add Audio Montages

- Each Audio Montage will be a chapter in the DVD.
- DVD tracks for each track in the imported Audio Montage will be created.

Choose the Montages to Add

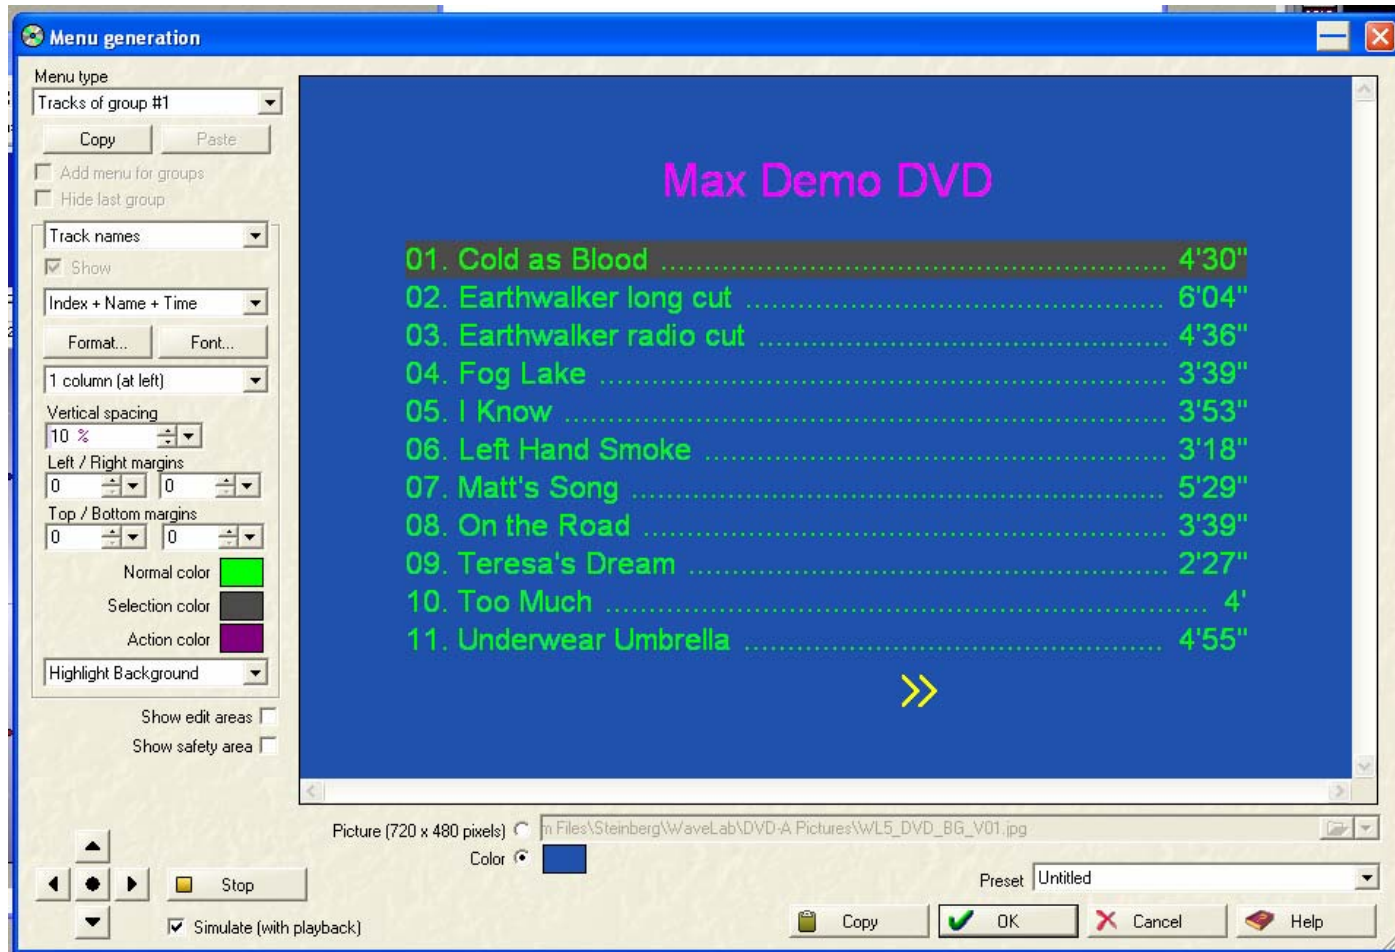

In the Montage Set to DVD Mode

The screenshot shows the 'max demo disc.mon' application window. The menu bar includes 'Edit', 'Zoom', 'Clips', 'Groups', 'Files', and 'Mar'. The toolbar contains 'Functions', 'Options', 'CD', and 'DVD' buttons, with 'DVD' being the active tab. Below the toolbar is a table of tracks with columns for 'Track name', 'ATS', 'DM', and 'Pause'. Track 2, 'Earthwalker long cut', is selected. At the bottom, a red diamond icon is labeled 'Matt's Song'.

	Track name	ATS	DM	Pause
1	Cold as Blood	<input checked="" type="checkbox"/>	Off	00:00:00.0000 0
2	Earthwalker long cut	<input type="checkbox"/>	Off	00:00:00.0000 0
3	Earthwalker radio cut	<input type="checkbox"/>	Off	00:00:00.0000 0
4	Fog Lake	<input type="checkbox"/>	Off	00:00:00.0000 0
5	I Know	<input type="checkbox"/>	Off	00:00:00.0000 0

In the DVD-A Project, select the Menu Generation

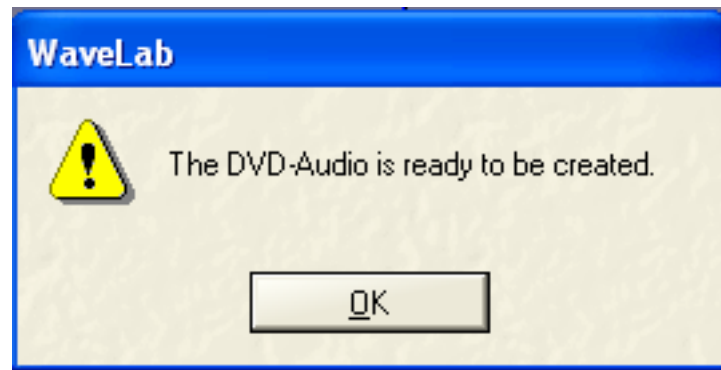

You can change a background to picture.
Wavelab comes with 10 free menu backgrounds.

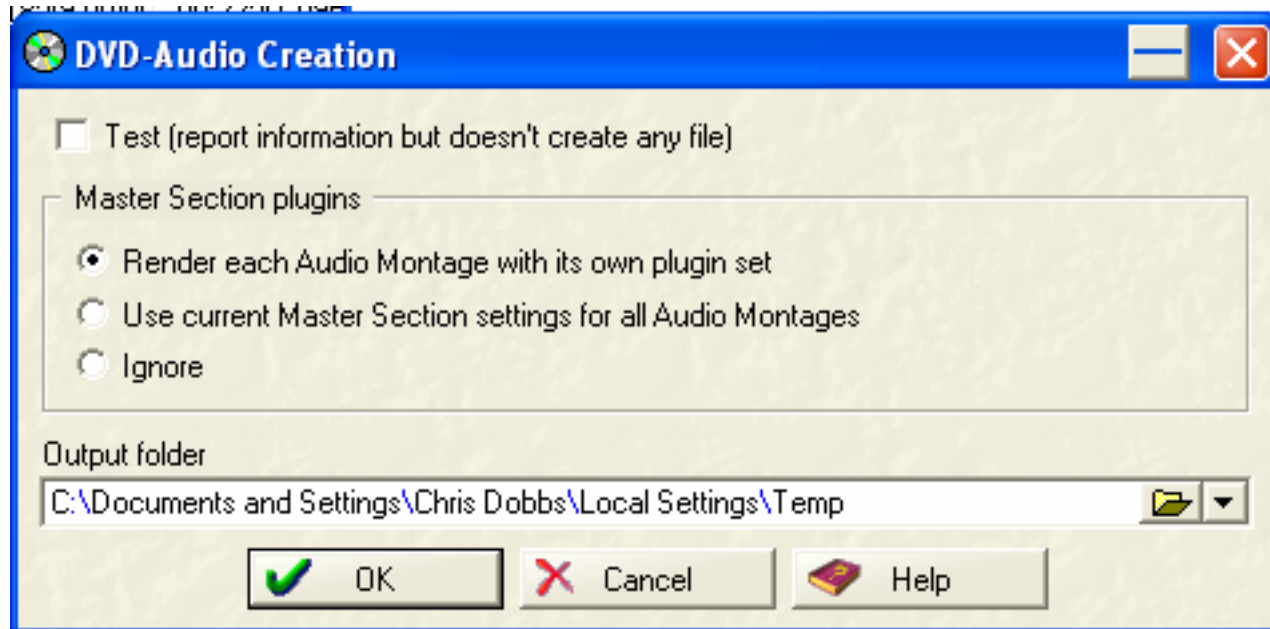

You can also change the color of the text, as well as style and font.

Once the menu is set, you can check to see if the desk is ready to be rendered.

Render the temporary TS file

Before you burn the DVD-A you can check the folders, add picture viewers, or save as an ISO image.
