

Wavelab 6 - How do I skip a selection?

There are two ways to skip a section on playback.

1. Skip Selection

Select part to skip.

Select skip on the transport

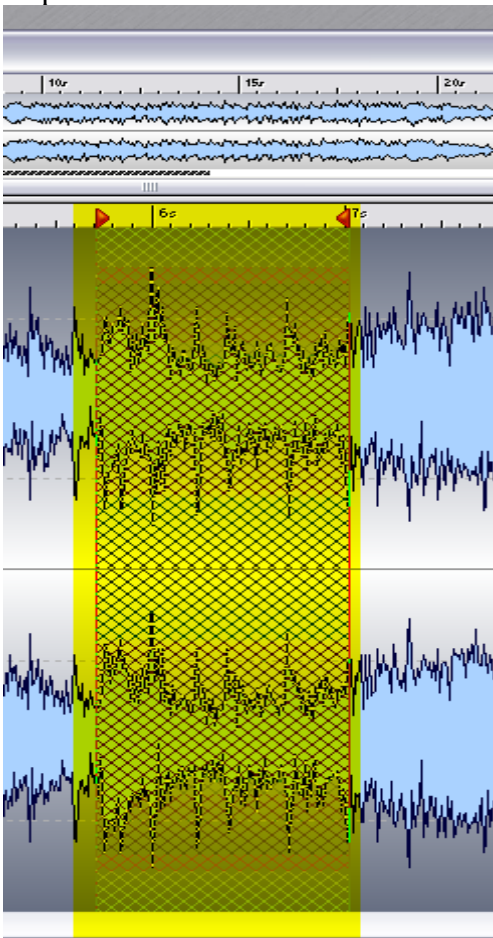

This menu will appear. Select skip selection.

Now when you press play it will skip over the region selected.

2. Skip Muted Regions

For this method you will first need to add mute markers for the section you would like to skip.

Select Skip on the transport then select Skip muted regions.

When you press play it will now skip over the muted region.
